Jesenhower A. Nachor

A motivated Information Technology fresh graduate from National University Dasmariñas with a strong foundation in mobile and web application development. Skilled in designing and developing user-friendly applications using modern frameworks and programming languages. Eager to apply technical knowledge, problem-solving skills, and continuous learning to contribute effectively to a dynamic development team.

Work Experience

During my senior high school on-the-job training (OJT), I participated in the installation of CCTV surveillance systems, which involved working in elevated and high-risk environments such as rice mills and utility poles. I was trained to utilize both coaxial and fiber optic cables for CCTV installation, gaining hands-on experience with industry-standard practices. Fiber optic cables required greater precision due to their fragility, while coaxial cables were more durable and easier to manage.

This OJT experience provided practical exposure to real-world technical work, strengthened my problem-solving and teamwork skills, enhanced professional communication, and contributed significantly to my confidence, responsibility, and career readiness.

Education

National University - Dasmarinas Cavite | Bachelor of Science in Information Technology | 2023-Present

Mangatarem National High school | Senior High School

Mangatarem National High school | Junior High School

Project

Risky.AI

I developed a basic voice-interactive AI system that processes spoken input and delivers corresponding responses through synthesized voice output.

Soft Skill

- Team Collaboration
- Time Management
- Willingness to learn
- Attention to detail

Hard Skill

- Python
- Javascript
- Dart
- Sql
- HTML5/CSS3

Frameworks & Development

React.js, flutter & node.js

Backend

Bash Scripting

Tool

Github and VS Code

Contacts

- 09460633855
